NOTE: SHAFT WALL STUD AND BATT INSULATION REQUIREMENT NOTED ARE MINIMUM REQUIREMENTS FOR THE SHAFT WALL, USE 6" METAL SHAFT STUD AND 4" BATT INSULATION.

The diagram illustrates the hardware layout for a door, showing the placement of the handle, lock, and kick plate relative to the door's dimensions. Key dimensions include the nominal door height (95 5/8" or 2414 mm), nominal door width (36 1/4" or 925 mm), and the distance from the top of the door to the handle (30 1/4" or 771 mm). The handle is positioned 18" (457 mm) from the top edge. The lock is positioned 45" (1143 mm) from the top edge. The kick plate is positioned 42" (1067 mm) from the top edge. The diagram also shows the location of the handle, lock, and kick plate relative to the door's edge. The handle is positioned 18" (457 mm) from the top edge. The lock is positioned 45" (1143 mm) from the top edge. The kick plate is positioned 42" (1067 mm) from the top edge. The diagram also shows the location of the handle, lock, and kick plate relative to the door's edge.

Dimension	Value	Value
NOM. DOOR HEIGHT	95 5/8"	2414 mm
